

Assessment - 1

Exercise 1: Identify the Prompt Technique

Objective: Check understanding of different prompt techniques.

Task: Determine which prompt technique is being used.

Instruction: Read the prompt below and identify the technique applied.

Prompt: "Summarize the following paragraph in one sentence."

Expected Output: Correct identification of the technique (Zero-Shot Prompting).

My answer: Zero- shot prompting, Because no examples are given but we get the output from one prompt.

Exercise 2: Prompt Recognition

Objective: Understand how a single example guides AI output.

Task: Identify the prompt technique used.

Instruction: Analyze the prompt below and name the technique.

Prompt: "Example: Question: What is AI?"

Answer: AI refers to machines that can perform tasks requiring human intelligence.

Now answer: What is Prompt Engineering?"

Expected Output: Correct identification of One-Shot Prompting.

My answer: One-shot prompting, because there a one example given with the prompt for the understanding of the AI to provide the required output.

Exercise 3 : Choose the Correct Technique

Objective: Apply the correct prompting method based on scenario.

Task: Select the most suitable prompt technique.

Instruction: Read the scenario and choose the correct technique.

Scenario: You want AI to follow the same writing style every time while generating responses.

Expected Output: Correct technique selection with a short justification (Few-Shot Prompting).

My answer: Few-shot prompting, we may have to give 2 or more examples for getting the required output.

Exercise 4 : One-Shot Prompt Creation

Objective: Practice writing a one-shot prompt.

Task: Create a prompt using exactly one example.

Instruction: Write a one-shot prompt to generate a polite response for a customer complaint, using one example response to guide tone.

Expected Output: A correctly structured one-shot prompt containing one example and a new task

My answer: Example,

Customer: "I received a damaged product."

Response: "We sincerely apologize for the inconvenience. Please share your order number, and we'll arrange a replacement as soon as possible."

Now respond to, Customer: "My package arrived late."

This contains exactly one example followed by a new task.

Exercise 5 : Rewrite Using Correct Technique

Objective: Apply prompt techniques in practice.

Task: Rewrite the prompt using an appropriate technique.

Instruction: Improve the prompt below by choosing the correct technique (Zero-Shot, One-Shot, or Few-Shot).

Prompt: "Make this sound professional: 'Send this now.'"

Expected Output: A rewritten prompt using an example-based approach.

My answer: One-Shot Prompt. And we will now give an example for the Ai to give the output we require. Example, Informal: "Can you fix this?"

Professional: "Could you please address this issue at your earliest convenience?"

Now rewrite: "Send this now."

Exercise 6 : True or False (Concept Trap)

Objective: Check conceptual clarity.

Task: Evaluate the statement.

Instruction: Mark the statement as True or False and justify your answer.

Statement: "Few-shot prompting is used when the task is very simple and well-known."

Expected Output: False, with correct explanation.

My answer: False, Because Few-shot is usually used for complex tasks which needs more examples for getting the required output.

Exercise 7 : Prompt Comparison

Objective: Understand how clarity affects AI responses.

Task: Evaluate two prompts.

Instruction: Compare the prompts below and identify which one will give better output.

Prompt A: "Write a product description."

Prompt B: "Write a 3-sentence product description for a budgeting app targeting young professionals."

Expected Output: Selection of Prompt B with a short explanation.

My answer: Prompt B, because it gives a clear view on what is necessary in the way the AI can understand. For example it defines the length, audience, and topic.

Exercise 8 : Technique Selection (Tricky)

Objective: Test understanding of when to use each technique.

Task: Select the correct prompt technique.

Instruction: Scenario You want AI to consistently follow the same writing style across multiple outputs. Choose the best technique and explain why.

Expected Output: Correct technique selection (Few-Shot Prompting) with brief reasoning.

My answer: Few-shot prompting. Because multiple examples teach the AI the expected writing pattern to improve consistency.

Exercise 9 : Bonus Challenge

Objective : You are unsure which technique to use.

Rule-based Question:

Fill in the blanks:

Simple task, no examples → _____ prompting

One example to guide style → _____ prompting

Multiple examples to train pattern → _____ prompting

My answer:

Zero-shot prompting

One-shot prompting

Few-shot prompting
